1/6/23 The panel did get wet along with a detector. The panel is working properly. I checked programming all good. I sent signals for alarms on all zones. We need to replace a device on first floor that was bad (2wb).
Door entry Maintenance replaced the strike. Troubleshoot non-working keypad. Found all connections were messy. Re did keypad to get it powered and working. Shorted out when code was entered. Strike was pulling too much power. Found maintenance was switching the negatives. Put back. All good.
1/20/23 Replaced bad smoke. Tested.
